

KAIRON AI – Career Twin Intelligence Platform

Overview

KAIRON AI is an AI-powered Career Twin Intelligence Platform that transforms a user's resume into an interactive digital career twin. The platform analyzes skills, projects, certifications, and professional experience to provide personalized career insights, skill-gap analysis, interview preparation, roadmap generation, and knowledge graph visualization.

KAIRON acts as a personal AI career mentor by continuously mapping a user's profile against industry requirements and generating actionable recommendations for career growth.

Key Features

AI Resume Intelligence

- Resume parsing and profile extraction
- Automatic skill identification
- Project and certification analysis
- Career role prediction
- Dynamic profile generation

Career Dashboard

- Readiness score calculation
- Skill indexing
- Project tracking
- Certification monitoring
- Personalized career insights

AI Assistant

- Resume-aware conversational assistant
- Answers based on uploaded profile
- Project-specific discussions
- Career guidance and recommendations
- Personalized learning suggestions

Skill Gap Analysis

- Compare current skills with target roles

- Missing competency detection
- Readiness assessment
- Growth recommendations
- Industry alignment scoring

Interview Intelligence

- AI-generated interview questions
- Project-based technical questions
- Role-specific preparation
- Behavioral interview guidance
- Resume-driven mock interview bank

Knowledge Graph

- Interactive project-to-skill visualization
- Relationship mapping
- Technology ecosystem analysis
- Certification and role connections
- Dynamic career intelligence graph

Career Roadmap Generator

- Personalized learning paths
- Goal-based milestone planning
- Career progression tracking
- Actionable development plans
- Industry-focused growth strategy

Productivity Workspace

- Notes management
- Task tracking
- Calendar scheduling
- Career planning workspace
- Personal productivity hub

Technology Stack

Frontend

- React.js
- TypeScript
- Tailwind CSS
- Recharts
- Framer Motion
- React Flow / Graph Visualization

Backend

- Python
- FastAPI
- REST APIs
- Resume Parsing Engine
- Career Analytics Engine

AI & Intelligence

- OpenRouter LLM Integration
- NLP Processing
- Skill Extraction
- Career Recommendation Engine
- Interview Question Generation

Data Processing

- PDF Resume Parsing
- Knowledge Graph Construction
- Skill Mapping
- Role Analysis
- Project Intelligence

Workflow
