

LEXORA – AI CAREER ROADMAP GENERATOR

Problem Statement

Many students and professionals struggle to identify the skills, technologies, certifications, and projects required to achieve their desired career goals. Information is often scattered across multiple platforms, making career planning confusing and time-consuming.

LEXORA aims to simplify career planning by providing personalized roadmaps for various technology careers, including AI Engineer, Machine Learning Engineer, Data Scientist, Data Analyst, Software Engineer, Cloud Engineer, DevOps Engineer, Cybersecurity Analyst, and more.

Objective

To develop an AI-powered web application that helps users explore different technology career paths and provides:

- Required skills
- Recommended projects
- Career progression roadmap
- Learning guidance

through an interactive and user-friendly interface.

Technologies Used

- Python
 - Gradio
 - Hugging Face Spaces
-

Features

Career Roles Supported

- AI Engineer
- Machine Learning Engineer
- Data Scientist
- Data Analyst
- Business Analyst

- Software Engineer
- Full Stack Developer
- MLOps Engineer
- Cloud Engineer
- Cybersecurity Analyst
- DevOps Engineer
- UI/UX Designer
- Product Manager

Career Guidance

For every role, LEXORA provides:

- Essential Skills
- Project Suggestions
- Career Path Progression
