

ML DEPLOYMENT IN AWS

This screenshot shows the 'Launch an instance' page in the AWS Management Console. The page is for the eu-north-1 region. A blue banner at the top suggests taking a walkthrough. The main content area is divided into two columns. The left column contains the 'Name and tags' section with a text input for the instance name (e.g., 'My Web Server') and the 'Application and OS Images (Amazon Machine Image)' section. The right column contains a 'Summary' section with details like 'Number of instances' (1), 'Software image (AMI)' (Amazon Linux 2023 AMI), 'Virtual server type (instance type)' (t3.micro), 'Firewall (security group)' (New security group), and 'Storage (volumes)' (1 volume(s) - 8 GiB). At the bottom right of the summary, there are 'Cancel' and 'Launch instance' buttons, along with a 'Preview code' link. The footer includes navigation links for CloudShell, Feedback, and Console Mobile App, along with copyright information for Amazon Web Services.

This screenshot shows the 'Launch an instance' page after a successful launch. A green banner at the top indicates 'Success' and 'Successfully initiated launch of instance (i-003eec886020fd2b4)'. Below this is a 'Launch log' section. The 'Next Steps' section features a search bar and a list of recommended actions: 'Create billing usage alerts', 'Connect to your instance', 'Connect an RDS database', 'Create EBS snapshot policy', 'Manage detailed monitoring', and 'Create Load Balancer'. Each action has a brief description and a corresponding button or link. The footer is identical to the previous screenshot, showing navigation links and copyright information.

The screenshot shows the AWS Management Console 'Instances' page. The table below represents the data visible in the console:

Name	Instance ID	Instance state	Instance type	Status check	Availability Zone	Public IPv4 DNS	Public IPv4 ...	Elastic
bhp	i-00b232625560631d0	Running	t3.micro	3/3 checks passed	eu-north-1a	ec2-13-61-5-161.eu-no...	13.61.5.161	-
banglorehous...	i-07a6c3eb07d7d11a4	Running	t3.micro	3/3 checks passed	eu-north-1a	ec2-13-48-1-231.eu-no...	13.48.1.231	-
CMS	i-012a0d4514a5769d0	Stopped	t3.micro	-	eu-north-1b	-	-	-
BurnoutPredic...	i-01f654693f83d8821	Running	t3.micro	3/3 checks passed	eu-north-1b	ec2-13-61-24-77.eu-no...	13.61.24.77	-
skin_recomme...	i-09cae8dddc9a215dc	Running	t3.micro	3/3 checks passed	eu-north-1b	ec2-13-60-105-34.eu-n...	13.60.105.34	-
zentrix-ai	i-003eec886020fd2b4	Running	t3.micro	3/3 checks passed	eu-north-1b	ec2-16-171-19-113.eu-...	16.171.19.113	-

(Click connect)

The screenshot shows the 'Connect to instance' page for the instance 'i-003eec886020fd2b4 (zentrix-ai)'. The connection details are as follows:

Instance ID	VPC ID	Security groups	IAM role
i-003eec886020fd2b4 (zentrix-ai)	vpc-07e3178471fb9e186	sg-06b18cd4c7df1210f (launch-wizard-9)	-

The 'SSH client' tab is selected, showing the following instructions:

- Open an SSH client.
- Locate your private key file. The key used to launch this instance is zentrix-key.pem
- Run this command, if necessary, to ensure your key is not publicly viewable.

```
chmod 400 "zentrix-key.pem"
```
- Connect to your instance using its Public DNS:

```
ec2-16-171-19-113.eu-north-1.compute.amazonaws.com
```

Example:

```
ssh -i "zentrix-key.pem" ubuntu@ec2-16-171-19-113.eu-north-1.compute.amazonaws.com
```

Note: In most cases, the guessed username is correct. However, read your AMI usage instructions to check if the AMI owner has changed the default AMI username.
